Allied & Scientific Health Office (SA Health) – UniSA
2024 Research Capacity Building for Allied Health Clinicians

Workshop: How to Communicate with Impact – Oral Presentations

AIM:

- To introduce the basics of what makes a good presentation;
- To showcase practical tips in developing and delivering a good presentation for different audiences.

OBJECTIVE:

We all remember good presentations, right? Good presentations can in a timely and consumer-friendly manner highlight and showcase one's work. But what makes a good presentation? Is it the content? How it is delivered? The tools used? Person delivering it? This training series will provide AHPs with the knowledge and skills to deliver good and compelling presentations.

CONTENT:

When developing presentations – what to do and what not to do; What tricks and strategies seasoned presenters use?

FORMAT:

Online via zoom, combination of didactic presentation, individual activity, and reflection/feedback to the wider group. The session will be recorded and sent out to all those who have registered upon conclusion.

Link will be provided following registration.
