6 Consultation and Education

During the routine inspections of food businesses, fact sheets were provided to owners explaining the commencement of the Act and its requirements.

7 Other activities

Council owns buildings that have rainwater as their drinking water supply. These buildings include, Works Depot, Council Office, Council owned Caravan Park, Seniors Citizens Centre, Kingston Medical Clinic, airport, and sailing club.

Council has implemented an Annual Rainwater Testing Program.

Throughout February 2017, Council undertook rainwater samples of all the rainwater tanks to determine suitability. A total of ten (10) samples were taken in February and a further one (1) in March, due to ongoing positives result for one of the venues. All samples were sent to IMVS laboratory to check for potability. There were four (4) samples that were found to have *E.coli* counts. Readings varied from 1 to 520 organisms were detected. All four (4) tanks were decontaminated. The decontamination procedure was effective as no further reading of *E.coli* was detected.

6 Consultation and Education

As part of Council's yearly 'Public Health Business Assessments Program' Council's EHO continues to provide information to guest accommodation and food business operators relating to the provision of safe and suitable water supplies

Council's EHO continues to provide educational information to hotels, guest houses, caravan parks, etc. on the safe and suitable use of rainwater for drinking purposes

7 Other activities

Council's EHO continues to support yearly educational sessions for food sector and public health sector businesses.

Food Safety and Public Health Information Sessions run by Council incorporate a learning segment in relation to the safe and suitable delivery of rainwater for drinking purposes. These information sessions outline the requirements of the Safe Drinking Water Act including capture, storage, maintenance and delivery of rainwater for drinking purposes.

Council currently have one (1) registered drinking water system in operation within the Township of Melrose. This is a Council driven 'Public Health Partnership' initiative working with the business community.

Rural City of Murray Bridge

Safe Drinking Water Act Annual Report 2016-2017

Activities under the Act

1 Appointment of authorised officers under the Safe Drinking Water Act

Name of authorised officer & qualifications (including auditing qualifications)	Position Title	Does the authorised officer work for more than one council? Provide details
Philip Eckert	A/Team Leader Regulation	No
Julie Savill	Environmental Health Officer	Yes (also Mid Murray Council)
Jeremy Byrnes	Environmental Health Officer	No
Emily Smith	Environmental Health Officer	No

2 Audits and inspections

Trading name of drinking water provider	Date of audit/inspection	Name of auditor/inspector
Nil		

3 Fees for audits and inspections

7 Other activities

There are a number of Council owned buildings such as the Works Depot, Council owned Caravan Park, Casuarina Lodges – rental units, sports grounds – netball, golf, football, that are connected to rainwater tanks.

Council has implemented an annual rainwater testing Program of all their rainwater tanks.

On 9th February 2017, a total of twelve (12) samples were taken and sent to IMVS laboratory to check for potability. There were five (5) fails. Council has opted to place signs to those tanks, where E.coli readings were detected, indicating that water is not suited for drinking. One sign was placed at the Netball Club, three were at Accommodation Units – but having discussions with the residents, rainwater is mostly used for in the garden, as SA Water is the main water supply. Another sign was placed at the Council workshop depot, as this water is not used for drinking. Council has a kitchen facility with spring water dispenser available for staff to use as their drinking water source.

7 Other activities

Council has many owned buildings throughout the Region, such as all the Works Depots in various towns – Penola, Millicent, Beachport and Kalangadoo, caravan parks in Beachport and Southend, halls and sports grounds in various townships, all being connected to rainwater tanks.

Council undertook rainwater samples of all the rainwater tanks in May 2017, to determine suitability of potable water. A total of 19 samples were taken and sent to IMVS laboratory.

Of these samples, eight (8) returned with positive detection of E.coli. And of these five (5) rainwater tanks were decontaminated. The other positive readings were from the taps being unclean.

All five (5) samples returned clear of any E.coli contamination, which demonstrated that decontamination process was effective.
