Data Processing

Processing of files:

- > Validates data submitted by hospitals
- > Produces error report for each file
- > Corrections are made in BLIS database to the records where errors are found in the validation reports.

Submission

All hospitals must submit data to BLIS monthly in accordance with the data standards and submission schedule set by BLIS Unit, SA Health. This means all required items must be completed and all responses must be within the valid range of codes.

For data submitted electronically the submission must also comply with the standard layout specifications and variable coding structures relevant to the collection format.

Submission Methods

Accepted submission methods are:

- > **EPAS Data pull:** Elective Surgery waiting list patient data is automatically pulled from EPAS.
- > **Non-EPAS electronic submissions:** Data files may be sent electronically via email. For data submitted electronically the submission must also comply with the standard layout specifications and variable coding structures relevant to the collection format.
- > **All Non-EPAS** submission must be received by close of business on the third working day of the month

Email Submissions: <mailto:health.blissubmissions@sa.gov.au>

Note this email address is only for the processing files. All queries should be logged in QSM.

Late submissions

Delays to submission, or significant data quality issues, may result in that hospital data being unavailable for pivotal monthly reporting. This may impact on operational and strategic decision making.

Key performance indicators for each hospital's submission completeness and deadline compliance are routinely monitored. Reports on compliance are provided to Executive.

If data or corrections are not submitted by the end of financial year cut-off of the third working day in September, no guarantee can be made that the data will be reported in the financial year period. This may result in episodes not being funded, and information being unavailable for reporting and statistical purposes.
